**BIRTH ALARM USA
7205 Waelti Drive
Melbourne, FL 32940**

We have used the Birth Alarm and have found it to be very effective in eliminating unattended foaling. This device allows the staff more flexibility and productivity in their schedules by providing confidence they will not miss a mare foal. The mares wear the device comfortably and do not resent its use during the day and or night. Overall, it is a very cost effective tool, but more importantly, it allows us to do a better job for the mare and foal.

Best Regards,

Bruce Hill
